

SC Pesticide NPDES Basics Flow Chart & Guide

ABBREVIATIONS:
 NOI = notice of intent
 IPM = integrated pest mgt. practices
 PDMP = pesticide discharge mgt. plan
 ONRW = outstanding national resource water

USE PATTERNS:
 # 1: Mosquito/ Other Flying Insect Pest Control
 # 2: Aquatic Weed and Algae Control
 # 3: Aquatic Nuisance Animal Control
 # 4: Forest Pest Control
 # 5: Intrusive Vegetation Control
 # 6: Other Similar Activities

MULTIPLE USE PATTERNS?
 If you apply pesticides to SC waters, the permit applies to you for each use pattern that would be to SC waters (see definition of "surface waters of the state" in the permit). If you have a use pattern that does not involve an application to SC waters, the permit does not apply to that use pattern. Exceeding the threshold for one use, but not another, only requires IPM/PDMP for use threshold exceeded. The NOI need only address the use(s) exceeded.

Simplified chart for requirements

Entity/Situation	Basic permit requirements	NOI	IPM	PDMP
Owner: Above	✓	✓	✓	✓
Owner: Below	✓			
For-hire: Above	✓	✓	✓	
For-hire: Below	✓			

If an owner is "below" and the owner's for hire applicator is "above", (or visa versa), IPM applies to application.

Pesticide NPDES program managed by SC DHEC's Bureau of Water. This chart/guide simplifies permit explanation and does not include all conditions and situations that may apply. Details can be found in the permit via our web site at: www.scdhec.gov/environment/water/npdes_pesticide.htm March 2017
